OBJECTIVE

Engineering student pursuing studies in the field of computer science , seeking internship opportunities in the same field.

EDUCATION

Btech in Computer Science, SRM University   2022-2026
CGPA : 8.9.

10th Boards (CBSE) , Modern School   2020
10th Boards (Percentage): 89

12th Boards (CBSE), Modern School   2022
12th Boards (Percentage): 86

SKILLS

Technical Skills	JAVA, Python , Kotlin, C++,SQL, MATLAB
Soft Skills	Datastructures, Problem Solving, Critical Thinking , Design Thinking
	Adaptability, Communicative, Multilingual, Teamwork

PROJECTS

Body Mass Index Application . Developed and launched a mobile application designed to calculate Body Mass Index and categorize user's obesity levels.

Cancer Detection using Image Processing. Developed a program using MATLAB and Python to analyse medical data for detection of leukemia. Implemented algorithms to process analyse patient data effectively. Utilized MATLAB's computational capabilities and Python's flexibility to create a Robust and vesatile diagnostic tool.

Demo ATM Machine. Engineered a prototype using C++. Developed a comprehensive system with functionalities including account balance inquiries , cash withdrawl and PIN management

AI Voice Assistant. Python based AI Bot which can help in basic desktop assistant features like opening youtube , playing music , telling date and time etc.
